Java - - version

A screenshot of a Windows desktop environment. A Command Prompt window is open, displaying the following text:

```
Microsoft Windows [Version 10.0.26200.8457]
(c) Microsoft Corporation. All rights reserved.

C:\Users\bipla>java --version
java 26.0.1 2026-04-21
Java(TM) SE Runtime Environment (build 26.0.1+8-34)
Java HotSpot(TM) 64-Bit Server VM (build 26.0.1+8-34, mixed mode, sharing)

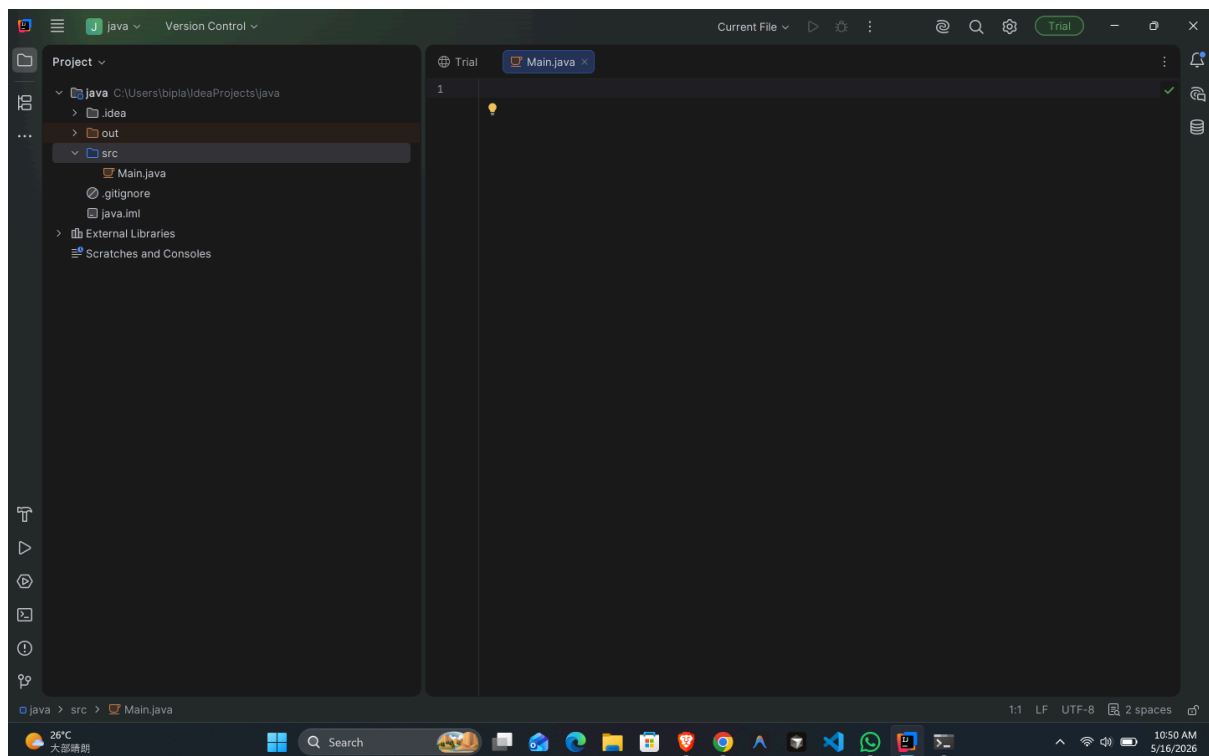

C:\Users\bipla>
```

The background shows a web browser window with a document titled 'A. Hello World Program' containing a list of tasks:

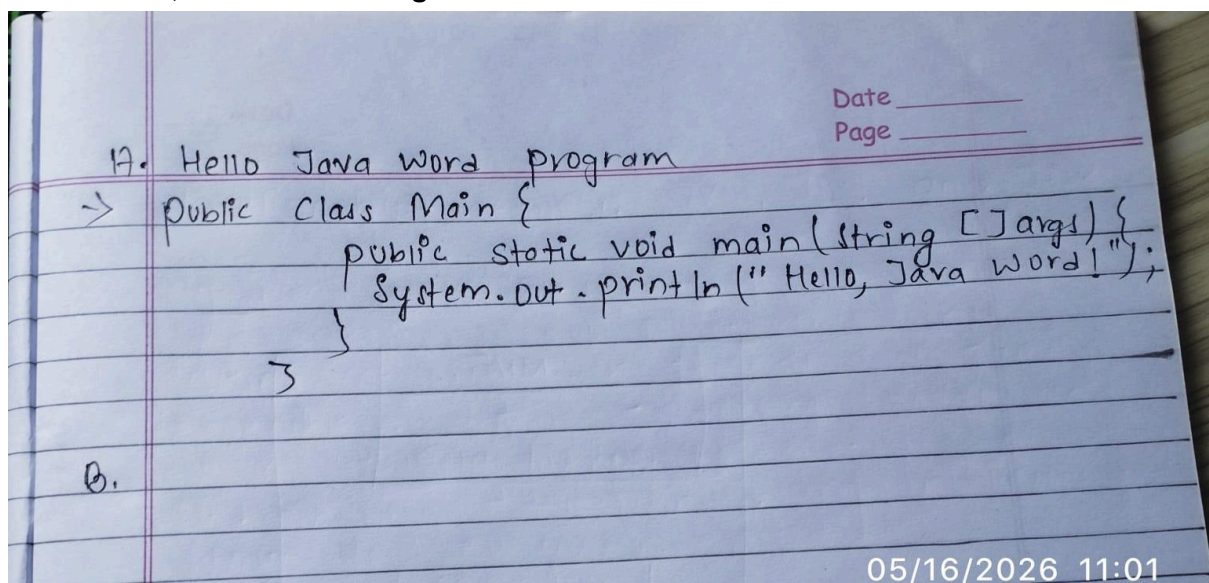

- Create a class Main.
- Print: Hello, Java World!

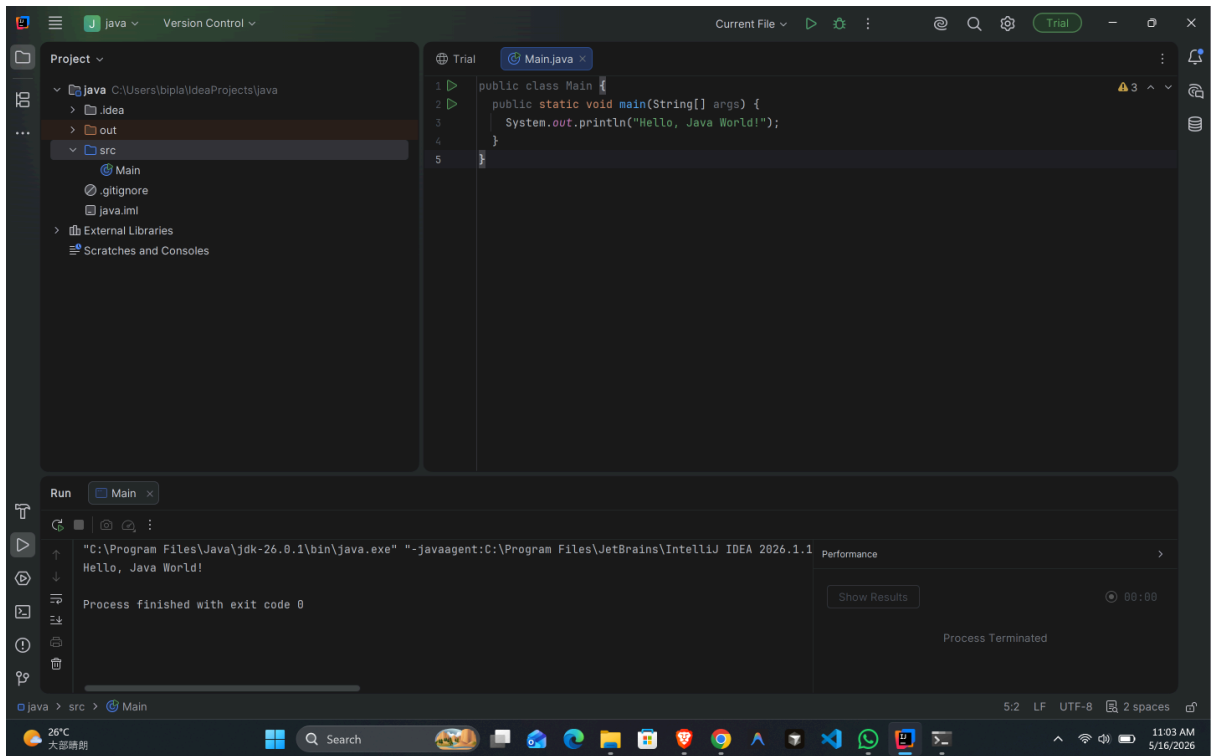

The Windows taskbar at the bottom shows the date and time as 10:50 AM 5/16/2026.

IntelliJ

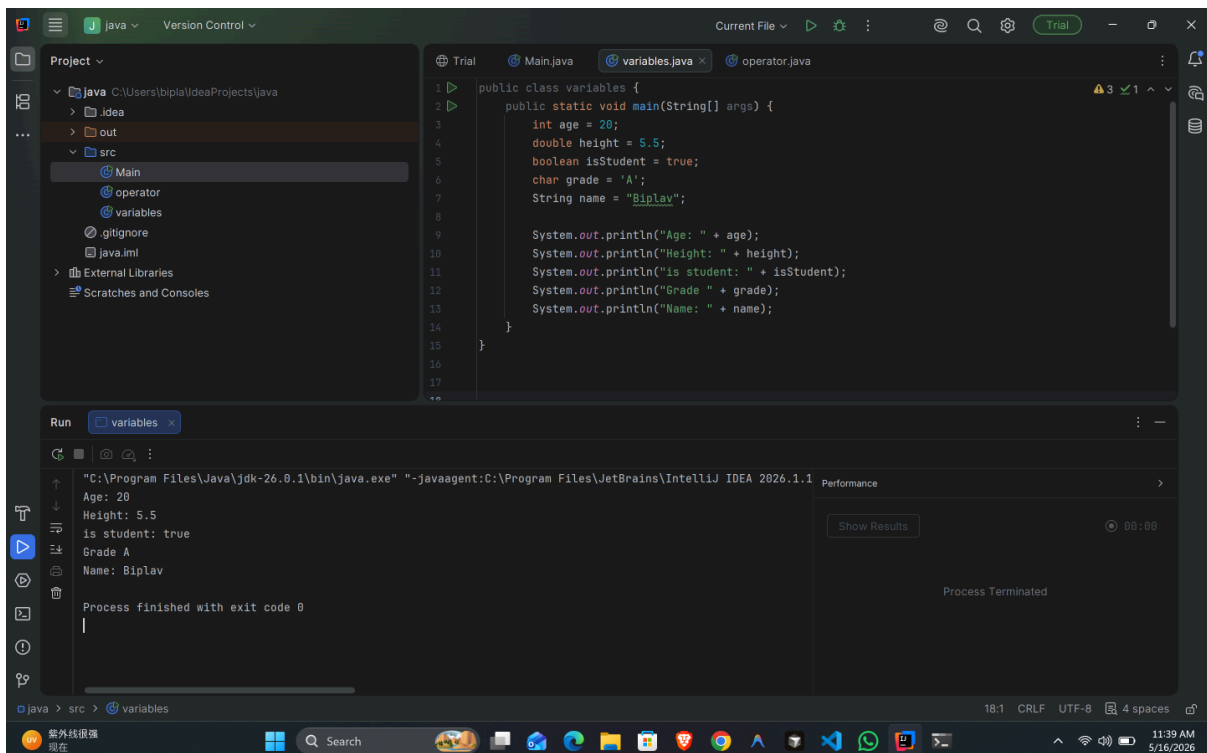

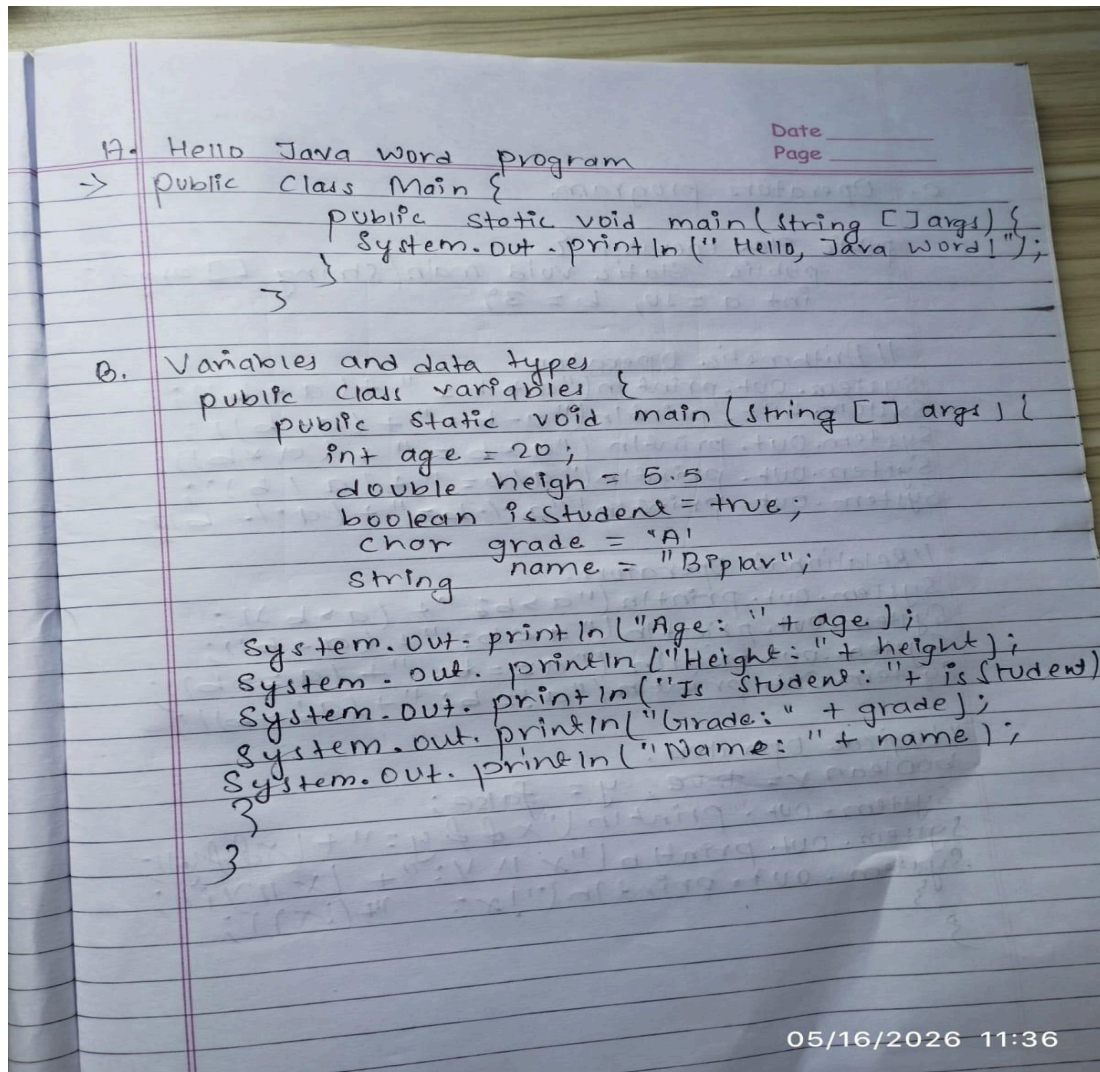

A. Hello, Java World! Program

B. Variables & Data Types

C. Operators program

c. Operators program.

```
public class operator {  
    public static void main(String [] args){  
        int a = 10, b = 3;
```

// Arithmetic Operator

```
System.out.println("a + b = " + (a + b));  
System.out.println("a - b = " + (a - b));  
System.out.println("a * b = " + (a * b));  
System.out.println("a / b = " + (a / b));  
System.out.println("a % b = " + (a % b));
```

// Relational Operators.

```
System.out.println("a > b: " + (a > b));  
System.out.println("a < b: " + (a < b));  
System.out.println("a == b: " + (a == b));  
System.out.println("a != b: " + (a != b));
```

// Logical Operator.

```
boolean x = true, y = false;  
System.out.println("x & y: " + (x & y));  
System.out.println("x || y: " + (x || y));  
System.out.println("!x: " + (!x));  
}
```
